Object of the Game

The Magic: The Gathering® game is a strategy game played by two or more players, each of whom has a customized deck of Magic™ cards. Over the course of the game, each player will take turns playing cards such as lands (which enable you to play your other cards), creatures, sorceries, and other spells. Each player starts at 20 life. When you reduce your opponent to 0 life by attacking with creatures and casting spells, you win!
You’re here because you want to learn the Magic: The Gathering game, the world’s premier trading card game. It was the first game of its kind, and it’s still the best and the biggest.

In the Magic game, you play the role of a planeswalker—a powerful wizard who fights other planeswalkers for glory, knowledge, and conquest. Your deck of cards represents all the weapons in your arsenal. It contains the spells you know and the creatures you can summon to fight for you.

Trading card games like the Magic: The Gathering game combine collectable cards with a strategy game. Start your collection with an intro pack and begin battling immediately with a ready-to-play deck.

Once you’ve gotten a handle on how to play, customize your deck using cards from booster packs, starting with the one included in your intro pack. You don’t know what cards you’ll get in a Magic booster pack. You just start a collection and trade with other players to get the cards you want. You can find stores where Magic cards are sold at http://www.wizards.com/locator.

The best part about a trading card game is that it’s always changing. You design and build your own unique decks, and each Magic game you play is different. New Magic expansions are released a few times a year, and each new expansion brings new ways to stupefy and defeat your opponents. Check out MagicTheGathering.com for daily articles, insider information, and news about upcoming sets!
Section 1: The Basics

Only one thing unites the infinite planes of the Multiverse: mana, the energy that fuels all magic. The five colors of mana are imbued in the land itself, and a planeswalker with a connection to a place can call upon its mana from across the sea of Æther between worlds.

Each color of mana fuels a different kind of powerful magic for you to command. For example, red spells have \( \mathbf{R} \) in their costs, and tapping (turning) a Mountain gives you \( \mathbf{R} \) that you can spend to cast spells. It’s up to you whether to master one color or all five.

---

Five Colors of Mana

White
Plains are the source of white magic, the color of light, protection, and above all, order. White magic is about making and enforcing the rules. White planeswalkers believe that without laws and the strength to uphold them, anarchy prevails. Those who follow the rules shall have honor and thrive while those who forsake them will ultimately suffer.

Blue
Blue magic flows from Islands. It focuses on manipulation and intellect. Blue tamperers with the fundamental order of things and thrives on controlling the environment, bending the rules to suit its own needs. Blue planeswalkers believe that the most important commodity is knowledge.

Black
Swamps are the source of black magic—the magic of death, decay, and power. Black planeswalkers embrace their ambition, and are willing to pay a price for greatness. They believe that life is about gaining power at all costs. Everything and everyone is a possible resource.

Red
Red magic comes from Mountains. Red planeswalkers can literally crush the ground beneath their feet, or call upon furious volcanic activity to destroy their foes. They want results and action instead of deliberation and debate. Chaos, destruction, and war—these are red magic’s staples.

Green
Forests are the root of green magic. From the power of nature, green magic provides growth and life to the planeswalkers who wield it. Green planeswalkers live and die according to the law of the jungle: only the strong survive, and every living thing is either predator or prey. Green planeswalkers believe that growth is the foundation of everything. In the end, life will win out.
Every Magic card has one or more types. A card’s type tells you when you can play the card and what happens to the card after you do.

**Sorcery**

A sorcery represents a magical incantation. You can cast a sorcery only during a main phase of one of your own turns. You can’t cast it when another spell is on the stack. (You’ll learn about phases and the stack in a bit.) A sorcery has its effect—in other words, you follow the instructions on the card—then you put it into your graveyard, which is the game term for your discard pile.
INSTANT
An instant is just like a sorcery, except you can cast it just about any time you want, even during your opponent’s turn or in response to another spell. Like a sorcery, an instant has its effect, then you put it into your graveyard.

ENCHANTMENT
An enchantment represents a stable magical manifestation. An enchantment is a permanent. This means two things: You can cast one only at the time you could cast a sorcery, and after you cast one, you’ll put it on the table in front of you, near your lands. (Most players keep their lands closer to them, then put their other cards closer to the middle of the table.) The card is now on the battlefield. Any of your cards on the battlefield is called a permanent because it sticks around permanently (well, unless something destroys it).

Some enchantments are Auras. An Aura enters the battlefield attached to a permanent and affects that permanent while it’s on the battlefield. If the enchanted permanent leaves the battlefield, the Aura is put into its owner’s graveyard.

ARTIFACT
An artifact represents a magical relic. Like an enchantment, an artifact is a permanent, so it’ll stay on the battlefield affecting the game. Most artifacts are colorless, so you can cast one no matter what kinds of lands you have.

Some artifacts are Equipment. You can pay to attach an Equipment to a creature you control to make that creature more powerful. If an equipped creature leaves the battlefield, the Equipment doesn’t—the creature drops it and it remains on the battlefield.

CREATURE
Creatures fight for you. They’re permanents, but unlike any other kind of permanent, creatures can attack and block. Each creature has power and toughness. Its power (the first number) is how much damage it deals in combat. Its toughness (the second number) is how much damage must be dealt to it in a single turn to destroy it. Creatures attack and block during the combat phase.

Unlike other types of permanents, creatures enter the battlefield with “summoning sickness”: a creature can’t attack, or use an ability that has O in its cost, until it has started your turn on the battlefield under your control. You can block with a creature or activate its other abilities no matter how long it’s been on the battlefield.

Artifact creatures are both artifacts and creatures. They’re usually colorless like other artifacts, and they can attack and block like other creatures. An artifact creature can be affected by anything that affects artifacts, as well as anything that affects creatures.
**PLANESWALKER**

Planeswalkers are powerful allies you can call on to fight by your side. They’re permanents, and each one enters the battlefield with the number of loyalty counters indicated in its lower right corner. Each planeswalker has abilities that add or remove loyalty counters to activate. For example, the symbol ✈ means “Put one loyalty counter on this planeswalker,” and the symbol ✐ means “Remove two loyalty counters from this planeswalker.” You can activate one of these abilities only at the time you could cast a sorcery, and only if none of that planeswalker’s abilities have been activated yet that turn.

Your planeswalkers can be attacked by your opponent’s creatures (if so, you can block as normal), and your opponent can damage them with their spells and abilities instead of damaging you. Any damage dealt to a planeswalker causes it to lose that many loyalty counters. If it has no loyalty counters, it’s put into your graveyard.

Planeswalkers are rich and complex, and this just scratches the surface. To learn more, visit [www.wizards.com/planeswalkers](http://www.wizards.com/planeswalkers).

**LAND**

Although lands are permanents, they aren’t cast as spells. To play a land, just put it onto the battlefield. This happens immediately, so no player can do anything else in response. You can play a land only during one of your main phases while the stack is empty. You can’t play more than one land a turn.

Most lands have abilities that make mana. You’ll use lands to make the mana you need to pay for spells and abilities.

Each basic land has a mana ability that makes one mana of a particular color. Plains make white mana (★), Islands make blue mana (●), Swamps make black mana (◆), Mountains make red mana (●), and Forests make green mana (●). Any land other than these five is a nonbasic land.

**Section 1: The Basics**
Since the Magic game doesn’t have a game board, zones are the areas of play that exist on your table.

**GAME ZONES**

**HAND**
When you draw cards, they go to your hand, just as in most other card games. No one except you can look at the cards in your hand. You start the game with seven cards in your hand, and you have a maximum hand size of seven. (You may have more than seven cards in your hand, but you must discard down to seven at the end of each of your turns.) Each player has his or her own hand.

**BATTLEFIELD**
You start the game with nothing on the battlefield, but this is where the action is going to be. On each of your turns, you can play a land from your hand. Creatures, artifacts, enchantments, and planeswalkers also enter the battlefield after they resolve. You can arrange your permanents however you want (we recommend putting lands closest to you), but your opponent must be able to see all of them and tell whether they’re tapped. This zone is shared by both players.

**GRAVEYARD**
Your graveyard is your discard pile. Your instant and sorcery spells go to your graveyard when they resolve. Your cards go to your graveyard if an effect causes them to be discarded, destroyed, sacrificed, or countered. Your planeswalkers go to your graveyard if they lose all their loyalty counters. Your creatures go to your graveyard if the damage they’re dealt in a single turn is equal to or greater than their toughness, or if their toughness is reduced to 0 or less. Cards in your graveyard are always face up and anyone can look at them at any time. Each player has his or her own graveyard.

**THE STACK**
Spells and abilities exist on the stack. They wait there to resolve until both players choose not to cast any new spells or activate any new abilities. Then the last spell or ability that was put onto the stack resolves, and players get a chance to cast spells and activate abilities again. (You’ll learn more about casting spells and activating abilities the next section.) This zone is shared by both players.

**EXILE**
If a spell or ability exiles a card, that card is put in a game area that’s set apart from the rest of the game. The card will remain there forever, unless whatever put it there is able to bring it back. Exiled cards are normally face up. This zone is shared by both players.

**LIBRARY**
When the game begins, your deck of cards becomes your library (your draw pile). It’s kept face down, and the cards stay in the order they were in at the beginning of the game. No one can look at the cards in your library, but you can know how many cards are in each player’s library. Each player has his or her own library.

**HERE’S WHAT A GAME IN PROGRESS LOOKS LIKE.**
In this example, there aren’t any exiled cards, and no spells are on the stack. (When you put a spell on the stack, you take the card from your hand and put it in the middle of the table until it finishes resolving.)
**SECTION 2: THE BUILDING BLOCKS**

This section describes the actions that you’ll take during a game. You’ll learn how to make mana, which is the resource you need to cast spells. It will then describe how to cast a spell, as well as how to use abilities. It will go over how to attack and block with your creatures. The section finishes with a brief description of how to build your first deck and an explanation of the game’s “Golden Rule.”

**Making Mana**

To do just about anything else in the game, you first need to be able to make mana. Think of mana as *Magic* money—it’s what you use to pay most costs. Each mana is either one of the five *Magic colors* or is *colorless*. When a cost requires colored mana, you’ll see colored mana symbols (\* for white, \(\) for blue, \(\) for black, \(\) for red, \(\) for green). When any kind of mana can be used to pay the cost, you’ll see a symbol with a number in it (like \(2\)).

Where does mana come from? Nearly every land in the game has an ability that produces mana. Basic lands just have a large mana symbol in their text boxes to show this—you can tap one of them to add one mana of that color to your *mana pool*. (Your mana pool is where mana is stored until you spend it.) Other lands, as well as some creatures, artifacts, and spells, may also make mana. They’ll say something like “Add \(\) to your mana pool.”

Mana that you’ve made doesn’t last forever. At the end of each *step* or *phase* of the turn, any unused mana in your mana pool disappears.

<table>
<thead>
<tr>
<th>BASIC LAND TYPE</th>
<th>CAN BE TAPPED FOR</th>
</tr>
</thead>
<tbody>
<tr>
<td>Plains</td>
<td>* (white)</td>
</tr>
<tr>
<td>Island</td>
<td>( (blue)</td>
</tr>
<tr>
<td>Swamp</td>
<td>( (black)</td>
</tr>
<tr>
<td>Mountain</td>
<td>( (red)</td>
</tr>
<tr>
<td>Forest</td>
<td>( (green)</td>
</tr>
</tbody>
</table>

**Tapping**

To tap a card is to turn it sideways. You do this when you use a land to make mana, when you attack with a creature, or when you activate an ability that has the \(\) symbol as part of its cost (\(\) means “tap this permanent”). When a permanent is tapped, that usually means it’s been used for the turn. You can’t tap it again until it’s been *untapped* (straightened out).

Sometimes an effect will tap a permanent. If this happens, you don’t get the effect you’d get if you chose to tap your permanent yourself.

At the beginning of each of your turns, you untap your tapped cards so you can use them again.
Now that you can make mana, you’ll want to use it to cast spells. All cards except lands are cast as spells. You can cast sorceries, creatures, artifacts, enchantments, and planeswalkers only during one of your main phases when there’s nothing else on the stack. Instants can be cast at any time.

**Casting a Spell**
To cast a spell, take the card you want to cast from your hand, show it to your opponent, and put it on the stack. The stack is the game zone where spells live. It’s usually in the middle of the table. There are a few choices that you need to make right now. If the spell is an instant or sorcery and says “Choose one —,” you choose which of the options you’re using. If the spell is an instant or sorcery and it has a *target*, you choose what (or who) that target is. Aura spells also target the permanents they’ll enchant. If the spell has $\text{x}$ in its cost, you choose what number $\text{x}$ stands for. Other choices will be made later, when the spell resolves.

**Target**
When you see the word “target” on a spell or ability, you have to choose one or more things for the spell or ability to affect. You’ll be able to choose only certain kinds of things, such as “target red permanent” or “target creature or player.”

You choose the targets for a spell when you cast it, and you choose targets for an activated ability when you activate it. If you can’t meet the targeting requirements, you can’t cast the spell or activate the activated ability. Once you choose targets, you can’t change your mind later. When the spell or ability resolves, it checks the targets to make sure they’re still *legal* (they’re still there, and they match the requirements stated by the spell or ability). If a target isn’t legal, the spell or ability can’t affect it. If none of the targets are legal, the spell or ability is countered and does nothing at all.

Now check what the spell’s cost is. Tap your lands to produce the mana necessary to pay that cost, and pay it. Once you do that, the spell has been cast.

**Responding to a Spell**
The spell doesn’t *resolve* (have its effect) right away—it has to wait on the stack. Each player, including you, now gets a chance to cast an instant or activate an activated ability *in response*. If a player does, that instant or ability goes on the stack on top of what was already waiting there. When all players decline to do anything, the top spell or ability on the stack will resolve.

**Resolving a Spell**
When a spell resolves, one of two things happens. If the spell is an instant or a sorcery, it has its effect (in other words, you follow the instructions on the card), then you put the card into your graveyard. If the spell is a creature, artifact, enchantment, or planeswalker, you put the card on the table in front of you, near your lands. The card is now on the battlefield. Any of your cards on the battlefield is called a *permanent* because it sticks around permanently (well, until something happens to it). Many permanents have abilities, which is text on them that affects the game.

After a spell or ability resolves, both players get the chance to play something new. If no one does, the next thing waiting on the stack will resolve (or if the stack is empty, the current part of the turn will end and the game will proceed to the next part). If either player plays something new, it goes on top of the stack and the process repeats.

Turn the page to see an example of spells on the stack.
The Lightning Bolt goes on the stack on top of Giant Growth so it resolves first. It deals 3 damage to Runeclaw Bear—enough to destroy it! When the Giant Growth tries to resolve, its only target is no longer on the battlefield, so it’s countered (it does nothing).

**What would happen if the Giant Growth were cast first?**

The Lightning Bolt goes on the stack on top of Giant Growth so it resolves first. It deals 3 damage to Runeclaw Bear—enough to destroy it! When the Giant Growth tries to resolve, its only target is no longer on the battlefield, so it’s countered (it does nothing).
As you start to accumulate permanents on the battlefield, the game will change. That’s because many permanents have text on them that affects the game. This text tells you a permanent’s abilities. There are three different kinds of abilities a permanent can have: static abilities, triggered abilities, and activated abilities.

**Static Abilities**
A static ability is text that is always true while that card is on the battlefield. For example, Levitation is an enchantment with the ability “Creatures you control have flying.” You don’t activate a static ability. It just does what it says.

**Triggered Abilities**
A triggered ability is text that happens when a specific event occurs in the game. For example, Elvish Visionary is a creature with the ability “When Elvish Visionary enters the battlefield, draw a card.” Each triggered ability starts with the word “when,” “whenever,” or “at.” You don’t activate a triggered ability. It automatically triggers whenever the first part of the ability happens. The ability goes on the stack just like a spell, and resolves just like a spell. If the ability triggers but then the permanent the ability came from leaves the battlefield, the ability will still resolve.

You can’t choose to delay or ignore a triggered ability. However, if the ability targets something or someone but you can’t choose a legal target for it, the ability won’t do anything.

**Activated Abilities**
An activated ability is an ability that you can activate whenever you want, as long as you can pay the cost. For example, Looming Shade is a creature with the ability “O: Looming Shade gets +1/+1 until end of turn.” Each activated ability has a cost, then a colon (“:”), then an effect. Activating one works exactly like casting an instant spell, except there’s no card to put on the stack. The ability goes on the stack just like a spell, and resolves just like a spell. If you activate an ability but then the permanent the ability came from leaves the battlefield, the ability will still resolve.

Some activated abilities contain the T symbol in their costs. This means that you must tap the permanent to activate the ability. You can’t activate the ability if the permanent is already tapped.

**Keywords**
Some permanents have abilities that are shortened to a single word or phrase. Most of these have reminder text that gives you a brief description of the ability’s effect. Keyword abilities in the core set include deathtouch, defender, enchant, equip, first strike, flash, flying, haste, landwalk (such as swampwalk or forestwalk), lifelink, protection, reach, shroud, trample, and vigilance. Most of these are static abilities, but keyword abilities can also be triggered abilities or activated abilities. Detailed explanations of each of these abilities can be found in the glossary at the end of this rulebook.
The primary way to win the game is to attack with your creatures. If a creature that’s attacking your opponent isn’t blocked, it deals damage equal to its power to him or her. It doesn’t take that many hits to drop your opponent all the way from 20 life to 0!

The middle of each turn is the combat phase. (You’ll learn about the parts of the turn in a bit.) In your combat phase, you choose which of your creatures will attack, and you choose who or what they will attack. Each one can attack your opponent or one of your opponent’s planeswalkers, but not any of his or her creatures. You tap the attacking creatures. They all attack at the same time, even if they’re attacking different things. You can attack with a creature only if it’s untapped, and only if it was on the battlefield under your control when the turn began.

Your opponent chooses which of his or her creatures will block. Tapped creatures can’t be declared as blockers. For blocking, it doesn’t matter how long the creature has been on the battlefield. Each creature can block only one attacker, but multiple blockers can gang up on a single attacking creature. If that happens, the attacking player orders the blockers to show which is first in line for damage, which is second, and so on. Creatures don’t have to block.

After all blockers are chosen, combat damage is assigned. Each creature—both attackers and blockers—deals damage equal to its power.
• An attacking creature that isn’t blocked deals damage to the player or planeswalker it’s attacking.
• An attacking creature that is blocked deals damage to the blocking creatures. If one of your attacking creatures is blocked by multiple creatures, you decide how to divide its combat damage among them. You must assign at least enough damage to the first blocking creature in line to destroy it before you can assign damage to the next one in line, and so on.
• A blocking creature deals damage to the attacker it’s blocking.

If damage is dealt to your opponent, he or she loses that much life!
If damage is dealt to your opponent’s planeswalker, that many loyalty counters are removed from it.
If a creature is dealt damage equal to or greater than its toughness over the course of a single turn, that creature is destroyed and goes to its owner’s graveyard. If a creature takes damage that isn’t lethal, that creature stays on the battlefield, but the damage doesn’t wear off until the turn ends.

Turn the page to see an example of combat.
**Example of Combat**

**1. Declaring Attackers**
The attacking player attacks with his three biggest creatures and taps them. He doesn't attack with the smallest because it's too easy to destroy, and it might be useful for blocking on the opponent's next turn.

**2. Assigning Blockers**
The defending player assigns blockers to two of the attackers and lets the third attacker through. Blocking choices are up to the defender.

**3. Combat Damage**
The unblocked attacker deals 3 damage to the defending player. The blocked attackers and the blockers deal damage to each other. The smaller creatures die and the bigger creatures live.
You play a Magic game with your own customized deck. You build it yourself using whichever Magic cards you want. There are two rules: Your deck must have at least 60 cards, and your deck can’t have more than four copies of any single card (except for basic lands). The rest is up to you, but here are some guidelines for getting started:

**Lands.** A good rule of thumb is that 2/5 of your deck should be lands. A 60-card deck usually has about 24 lands.

**Creatures.** Creatures account for 20 to 30 cards in a typical 60-card deck. Choose creatures that have a variety of mana costs. Low-cost creatures are potent early on, but high-cost creatures can quickly win a game once they enter the battlefield.

**Other cards.** Artifacts, enchantments, planeswalkers, instants, and sorceries round out your deck.

After you play with your new deck for a while, you can start to customize it. Take out cards you don’t feel are working well and add new cards you want to try. The best part about trading card games is being able to play with whatever cards you want, so start experimenting!

When a Magic card contradicts the rulebook, the card wins. For example, the rules say you have a maximum hand size of seven. But Spellbook reads “You have no maximum hand size.” Spellbook changes the rules as long as it’s on the battlefield. One of the things that makes the Magic game fun to play is that there are individual cards that let you break almost every rule.
Section 3: Playing a Game

Now that you know the elements of the game and how to perform the main actions, it’s time to walk through a turn. This section describes what happens in each part of a turn. In a typical game, you’ll skip many of these parts (for example, nothing usually happens in the “beginning of combat” step). An actual Magic game is pretty casual, despite how complex the structure may seem.

Get a Deck

You’ll need your own Magic deck. You’ll also need a way to keep track of both players’ life totals.

Get a Friend

To play a game, you’ll need an opponent! Your opponent will play against you using his or her own deck.

Start the Game

Each player starts at 20 life. You win the game by reducing your opponent to 0 life. You also win if your opponent has to draw a card when none are left in his or her deck, or if a spell or ability says that you win.

Decide which player will go first. If you’ve just played the same opponent, the loser of the last game decides who goes first. Otherwise, roll a die or flip a coin to see who gets to decide.

Each player shuffles his or her deck, then draws a hand of seven cards to start. If you don’t like your opening hand, you can mulligan. Shuffle your hand back into your deck and draw a new hand of six cards. You can keep doing this, drawing a hand of one fewer card each time, until you decide to keep your cards.
Below are the parts of a turn. Each turn proceeds in the same sequence. Whenever you enter a new step or phase, any triggered abilities that happen during that step or phase trigger and are put on the stack. The active player (the player whose turn it is) gets to cast spells and activate abilities, then the other player does. When both players in a row decline to do anything and nothing is waiting to resolve, the game will move to the next step.

With each part of the turn is a description of what can happen during that part, if it’s your turn.

1. **BEGINNING PHASE**  
   a. **Untap step**  
      You untap all your tapped permanents. On the first turn of the game, you don’t have any permanents, so you just skip this step. No one can cast spells or activate abilities during this step.
   b. **Upkeep step**  
      This part of the turn is mentioned on a number of cards. If something is supposed to happen just once per turn, right at the beginning, an ability will trigger “at the beginning of your upkeep.” Players can cast instants and activate abilities.
   c. **Draw step**  
      You draw a card from your library. (The player who goes first skips the draw step on his or her first turn to make up for the advantage of going first.) Players can then cast instants and activate abilities.

2. **FIRST MAIN PHASE**  
   You can cast any number of sorceries, instants, creatures, artifacts, enchantments, and planeswalkers, and you can activate abilities. You can play a land during this phase, but remember that you can play only one land during your turn. Your opponent can cast instants and activate abilities.

3. **COMBAT PHASE**  
   a. **Beginning of combat step**  
      Players can cast instants and activate abilities.
   b. **Declare attackers step**  
      You decide which, if any, of your untapped creatures will attack, and which player or planeswalker they will attack, then they do so. This taps the attacking creatures. Players can then cast instants and activate abilities.
   c. **Declare blockers step**  
      Your opponent decides which, if any, of his or her untapped creatures will block your attacking creatures, then they do so. If multiple creatures block a single attacker, you order the blockers to show which is first in line for damage, which is second, and so on. Players can then cast instants and activate abilities.
   d. **Combat damage step**  
      Each attacking or blocking creature that’s still on the battlefield assigns its combat damage to the defending player (if it’s attacking that player and wasn’t blocked), to a planeswalker (if it’s attacking that planeswalker and wasn’t blocked), to the creature or creatures blocking it, or to the creature it’s blocking. If an attacking creature is blocked by multiple creatures, you divide its combat damage among them by assigning at least enough damage to the first blocking creature in line to destroy it before assigning damage to the next one in line, and so on. Once players decide how the creatures they control will deal their combat damage, the damage is all dealt at the same time. Players can then cast instants and activate abilities.
   e. **End of combat step**  
      Players can cast instants and activate abilities.

4. **SECOND MAIN PHASE**  
   Your second main phase is just like your first main phase. You can cast every type of spell and activate abilities, but your opponent can only cast instants and activate abilities. You can play a land during this phase if you didn’t during your first main phase.

5. **ENDING PHASE**  
   a. **End step**  
      Abilities that trigger “at the beginning of your end step” go on the stack. Players can cast instants and activate abilities.
   b. **Cleanup step**  
      If you have more than seven cards in your hand, choose and discard cards until you have only seven. Next, all damage on creatures is removed and all “until end of turn” effects end. No one can cast instants or activate abilities unless an ability triggers during this step.
The Next Turn

Now it’s your opponent’s turn. That player untaps his or her permanents and goes from there. After that player is done, it will be your turn again. Keep going until a player is reduced to 0 life. As soon as a player has 0 life, the game ends immediately and the other player wins!

The Ever-Changing Game

One of the fascinating aspects of the Magic game is that it changes from turn to turn—and the cards themselves can actually alter the rules of the game. As you play, you’ll find nonland cards with abilities that produce mana, and lands that do other things besides produce mana. You’ll find creatures with the haste ability, which allows them to attack right away. You’ll find creatures with flying and trample, which change the rules of combat. You’ll find cards with abilities that work from your graveyard. You’ll find cards whose abilities work together for an effect that’s much more powerful than either one could achieve alone (such as the combo of Blinding Mage and Royal Assassin). This is a game of discovery, of amazement, of fighting, and of tricks. This is a game of magic.

Section 3: Playing a Game
Section 4: Different Ways to Play

You know everything you need to play a Magic game. But what kind of game will you play? Appropriately enough for a game with so many options, there are lots of different ways to play. Everyone can start on equal footing with brand-new cards, or you can build a deck in advance from the cards in your collection. You can even play with a bunch of friends, not just one.

Limited Formats

In Limited play, each player builds his or her own deck on the spot out of a number of booster packs. In other words, your deck is made from a limited card pool. Each deck must contain at least 40 cards. The only cards you can play with are the ones opened in those packs, plus any number of basic land cards. (A 40-card deck should have about 17 lands and about 15 creatures.)

Sealed Deck (2 or more players)

In this Limited format, you build a deck out of brand-new booster packs. Each player opens five or six 15-card boosters and builds a 40-card deck using the cards from his or her packs and any number of basic lands.

Booster Draft (4 to 8 players)

In this Limited format, you select the cards you’ll build your deck from. Each player at the table starts with three unopened 15-card booster packs. Each player opens his or her first pack, chooses a card, and passes the rest to the left. Don’t show anyone your picks or what’s in the packs! Take one card from each pack passed to you and pass the rest to your left until all the cards have been taken. Repeat this process with the second pack, but pass it to the right. For the last pack, pass to the left again. Use your picks and any number of basic lands to build your 40-card deck.

Sideboards

Each Magic deck may have a sideboard—a group of extra cards that are particularly good against certain opponents. For example, a card that says “Destroy all green creatures” is great against someone playing a green deck, but useless against anyone else. After you play a game against an opponent, you may move cards from your sideboard into your main deck, then play that opponent again. You must reset your deck to its original configuration before playing someone new.

In a Limited game, all the cards you opened that aren’t in your main deck are in your sideboard. Between games, you may swap in cards from your sideboard in exchange for the same number of cards in your main deck. You may also simply add cards from your sideboard to your main deck.

In a Constructed game, your sideboard consists of exactly 15 cards. You build your sideboard as you build your deck. Your combined deck and sideboard can’t have more than four copies of any card other than basic land cards. Between games, you may swap in cards from your sideboard in exchange for the same number of cards from your main deck.
In Constructed play, each player brings his or her own deck to the game. In other words, your deck must be constructed in advance. Each deck must contain at least 60 cards. A deck may contain any number of basic land cards, but no more than four copies of any other card. The pool of cards that players use to build their decks depends on exactly which Constructed format they’re playing.

**STANDARD**
Standard is the most popular Constructed format. For a Standard game, you build a deck using cards from the two most recent October large expansions and all other expansions and core sets released since the first of those October expansions.

**EXTENDED**
For an Extended game, you build a deck using cards from the seven most recent October large expansions and all other expansions and core sets released since the first of those October expansions.

**BLOCK CONSTRUCTED**
For a Block Constructed game, you build a deck using cards from the most recent October expansion and any of the two expansions released after it. You can’t use cards from the core set.

**LEGACY**
For a Legacy game, you build a deck using cards from any Magic set. This format has an extensive Banned List.

**VINTAGE**
For a Vintage game, you build a deck using cards from any Magic set. This format has an extensive Restricted List.

**BANNED AND RESTRICTED**
Some cards have proven to be too powerful for certain Constructed formats. These cards have been banned (meaning you can’t play with them at all) or restricted (meaning you can play at most one of each of them, rather than the typical four). Only the Vintage format has a Restricted List. These lists are updated quarterly. Check MagicTheGathering.com for announcements on December 20, March 20, June 20, and September 20.

You can play a Magic game with more than two players in it. There are dozens of different ways to do so. Three of the most popular are Two-Headed Giant, Emperor, and Free-for-All.

**TWO-HEADED GIANT**
In a Two-Headed Giant game, you and a teammate play against another two-person team. You and your teammate take your turns at the same time! Each team has a shared life total that starts at 30.

**EMPEROR**
In an Emperor game, two three-player teams face off. Each team has an emperor, who sits in the middle of the team. The remaining players on the team are generals whose job is to protect the emperor. A team wins when the opposing emperor has been defeated.

**FREE-FOR-ALL**
In a Free-for-All game, each player acts as an individual against multiple opponents. You win if you’re the last one standing!

**TIPS**
In a multiplayer game, the first time a player takes a mulligan, he or she draws a new hand of seven cards rather than six cards. Subsequent hands decrease by one card as normal.

In a Two-Headed Giant game, the team who plays first skips the draw step of their first turn. In all other multiplayer games, no player skips the draw step of his or her first turn.

Learn more about these and other Magic formats at www.wizards.com/MagicFormats.
**Section 5: Glossary**

1, 2, 3, and so on, ♦

One of these generic mana symbols in a cost means “this many of any type of mana.” For example, 2 in a cost means you can pay two mana of any type, such as ♦ and ♦, or ♦ and ♦, or ♦ and one colorless mana, and so on. (If ♦ is in a cost, you get to choose what number the X stands for.)

These symbols are also found in some abilities that produce mana, like “Add 1 to your mana pool.” In this context, 1 means “one colorless mana.” You can’t use colorless mana to pay for colored mana costs.

♦ (white mana)

One white mana. Tapping a Plains makes ♦. A card with ♦ in its mana cost is white.

♦ (blue mana)

One blue mana. Tapping an Island makes ♦. A card with ♦ in its mana cost is blue.

♣ (black mana)

One black mana. Tapping a Swamp makes ♣. A card with ♣ in its mana cost is black.

♦ (red mana)

One red mana. Tapping a Mountain makes ♦. A card with ♦ in its mana cost is red.

♠ (green mana)

One green mana. Tapping a Forest makes ♠. A card with ♠ in its mana cost is green.

♣ (tap)

This symbol means “tap this card” (turn it sideways to show that it’s been used). It appears in activation costs. You can’t pay a ♣ cost if the card is already tapped. Also, remember that you can’t pay your creature’s ♣ costs until the creature starts your turn on the battlefield under your control.

1 ♦, ♦, and so on

Hybrid mana symbols represent a cost that can be paid with either of two colors. For example, a cost represented by the ♦ symbol can be paid with one white mana or one blue mana. It’s both a white and a blue mana symbol, and a card with oh1 in its mana cost is both white and blue.

★/★

Instead of numbers, some creatures have stars for their power and toughness. This means the creature’s power and toughness are set by an ability it has rather than being fixed numbers. For example, Nightmare has an ability that reads “Nightmare’s power and toughness are each equal to the number of Swamps you control.” If you control four Swamps when Nightmare enters the battlefield, it will be 4/4. If you play more Swamps later on, it will get even bigger.

Ability

Any text on a permanent (except reminder text and flavor text) tells you the permanent’s abilities. There are three kinds of abilities a permanent can have: activated abilities, static abilities, and triggered abilities. Unless they say otherwise, abilities “work” only while the permanent they’re on is on the battlefield. Once a triggered ability triggers or an activated ability is activated, it will resolve unless it’s countered; it doesn’t matter what happens to the source of the ability once the ability goes on the stack. See “Abilities” on page 11.

Activate

You activate an activated ability by putting it on the stack. You activate an ability just as you cast a spell: announce it, choose its targets, and pay its activation cost. See “Activated Abilities” on page 11.

Activated ability

One of the three kinds of abilities a permanent can have. An activated ability is always written in the form “cost: effect.” See “Activated Abilities” on page 11.

Active player

The player whose turn it is. The active player always gets the first chance to cast spells and activate abilities.
Additional cost
Some spells say they have an additional cost. To cast that spell, you must pay both the mana cost in the upper right corner of the card and its additional cost.

Artifact
A card type. See “Artifact” on page 5.

Artifact creature
This is both an artifact and a creature. See “Creature” on page 5.

Attack
How your creatures deal damage to your opponent. During your combat phase, you decide which, if any, of your untapped creatures will attack, and which player or planeswalker they will attack, then they all do so at once. Attacking causes creatures to tap. Creatures can attack only players or planeswalkers, not other creatures. Your opponent then gets a chance to block your attacking creatures with his or her own creatures. See the explanation of “Attacking and Blocking” on page 12.

Attacking creature
A creature that’s attacking. A creature is attacking from the time it’s declared as an attacker until the combat phase ends, unless it’s somehow removed from combat. There’s no such thing as an attacking creature outside of the combat phase.

Aura
A special type of enchantment that can be attached to a permanent. Each Aura has the keyword “enchant” followed by what it can be attached to: “enchant creature,” “enchant land,” and so on. When you cast an Aura spell, you choose one of the right kind of permanent to target. When the Aura resolves, it’s put onto the battlefield attached to that permanent (it’s not targeting it anymore). The Aura stays there until it’s destroyed or the permanent it’s attached to leaves the battlefield. If the permanent leaves the battlefield, the Aura card is put into your graveyard.

Basic land
There are five basic lands. Plains make \( \bullet \) (white mana). Islands make \( \bullet \) (blue mana). Swamps make \( \bullet \) (black mana). Mountains make \( \bullet \) (red mana). Forests make \( \bullet \) (green mana). They each say “basic” on their type line (basic is a supertype). Lands other than these five are called nonbasic lands.

When building a deck, you can include any number of basic lands. You can’t have more than four copies of any other cards in your deck.

Basic land type
Each basic land has a subtype, which appears after “Basic Land —” on its type line. These are the “basic land types,” which are the same five words as the basic land names. Some nonbasic lands also have basic land types. Any land with a basic land type has an activated ability that makes one mana of the appropriate color, even if it doesn’t say so in the text box. For example, every Forest has the ability “\( \bullet \): Add \( \bullet \) to your mana pool.”
Blocked creature
An attacking creature that’s blocked by at least one creature. Once a creature is blocked, it stays blocked for the rest of the combat phase—even if all the creatures blocking it leave combat. In other words, once a creature is blocked, there’s no way for it to deal damage to the player or planeswalker it’s attacking (unless the attacking creature has trample). There’s no such thing as a blocked creature outside of the combat phase.

Blocking creature
A creature assigned to block an attacking creature. If a creature blocks an attacker, the attacker deals its damage to the blocker instead of to the player or planeswalker it’s attacking. Once a creature blocks, it stays a blocking creature for the rest of the combat phase—even if the creature it’s blocking leaves combat. There’s no such thing as a blocking creature outside of the combat phase.

Booster, booster pack
A pack of randomly assorted Magic cards. When you want to add more cards to your collection, this is what you’ll get. Most 15-card booster packs contain one rare or mythic rare card, three uncommon cards, and eleven common cards, including one basic land card. Find stores where Magic cards are sold at http://locator.wizards.com.

Booster Draft
See “Limited Formats” on page 18.

Card type
Every card has at least one card type: artifact, creature, enchantment, instant, land, planeswalker, or sorcery. A card’s type is printed under its illustration. Some cards, like artifact creatures, have more than one type. Some cards also have subtypes, such as “Goblin” and “Warrior” in “Creature — Goblin Warrior,” or supertypes, such as “basic” in “Basic Land — Forest.”

Cast
You cast a spell by putting it on the stack. Different kinds of spells can be cast at different times, but the things you have to do to cast a spell are always the same: announce it, choose its targets (and make certain other choices right away), and pay its cost. See “Spells” on page 9.

Choose one —
When you see the phrase “Choose one —” on a card, you have to choose one option on the card when you cast it. You can’t change your mind and choose something else later on, even if your first choice doesn’t work out.

Cleanup step
See “Parts of the Turn” on page 16.

Collector number
See “Parts of a Card” on page 4.

Color
The five Magic colors are white, blue, black, red, and green. If a spell or ability tells you to choose a color, you must choose one of those five. A card’s color is determined by its mana cost. For example, a card that costs is blue and a card that costs is both red and white. Cards with no colored mana in their mana costs, like most artifacts, are colorless. (Colorless is not a color.) Lands are also colorless.

Some effects can change a permanent’s color. For example, “Target creature becomes blue until end of turn.” The new color replaces the previous colors, unless the ability says otherwise.

Colorless
Lands and most artifacts are colorless. Colorless is not a color. If something tells you to choose a color, you can’t choose colorless.

Combat
In general, combat means attacking, blocking, and all the stuff that happens during a combat phase.

Combat damage
Damage dealt by creatures due to attacking and blocking. A creature deals combat damage equal to its power. This damage is dealt during the combat damage step. Any other kind of damage doesn’t count as combat damage, even if it’s dealt as the result of a creature’s ability during combat.
**Combat damage step**
See “Parts of the Turn” on page 16.

**Combat phase**
See “Parts of the Turn” on page 16.

**Concede**
To stop playing a game and give your opponent the victory. You can concede a game at any time (usually if you realize you won’t be able to avoid losing). When you concede, you lose the game.

**Constructed**
A group of play formats that use decks you build in advance. See “Constructed Formats” on page 19.

**Continuous effect**
An effect that lasts for some duration. These are different from one-shot effects, which just happen once and don’t have a duration. You can tell how long a continuous effect will last by reading the spell or ability it came from. For example, it might say “until end of turn.” If the continuous effect comes from a static ability, it lasts as long as the permanent with the ability is on the battlefield.

**Control**
You control spells you cast and permanents that entered the battlefield on your side. You also control abilities that come from permanents you control.

Only you can make decisions for things you control. If you control a permanent, only you can activate its activated abilities. Even if you put an enchantment on your opponent’s creature, you control the enchantment and its abilities. For example, let’s say you enchant your opponent’s creature with Armored Ascension (“Enchanted creature gets +1/+1 for each Plains you control and has flying”). Armored Ascension doesn’t count how many Plains your opponent controls—it counts how many Plains you control.

Some spells and abilities let you gain control of a permanent. Most of the time, this means the card will move from your opponent’s side to yours. But for Auras or Equipment attached to other cards, the controller changes but it doesn’t move. Let’s say your opponent gains control of your Armored Ascension. Now it counts how many Plains your opponent controls—but the Aura still stays on the same creature.

**Controller**
A spell’s controller is the player who cast it. An activated ability’s controller is the player who activated it. A permanent’s controller is the player who cast it—unless another spell or ability changes who controls it. A triggered ability’s controller is the player who controlled the source of the ability when it triggered.

**Converted mana cost**
The total amount of mana in a mana cost, regardless of color. For example, a card with a mana cost of $\textcolor{red}{3}\textcolor{blue}{1}\textcolor{green}{1}$ has a converted mana cost of 5. A card with mana cost $\textcolor{black}{2}\textcolor{black}{2}$ has a converted mana cost of 2.

**Cost**
A cost is something you have to pay to take another action. You must pay a cost to cast a spell or activate an activated ability. Sometimes a spell or ability will also ask you to pay a cost when it resolves. You can’t pay a cost unless you can pay all of it. For example, if an activated ability’s cost (the part before the “:”) tells you to discard a card and you have no cards in your hand, you can’t even try to pay it.

**Counter a spell or ability**
To cancel out a spell or ability so it has no effect. If a spell is countered, it’s removed from the stack and put into its owner’s graveyard. Once a spell or ability starts to resolve, it’s too late to counter it. Lands aren’t spells, so they can’t be countered.

**Counter on a permanent**
Some spells and abilities tell you to put a counter on a permanent. The counter marks a change to the permanent that lasts for as long as it’s on the battlefield. A counter usually changes a creature’s power and toughness or tracks a planeswalker’s current loyalty. You can use anything you want as counters: glass beads, dice, or whatever.

**Creature**
A card type. See “Creature” on page 5.
Creature type
This tells you what kind of creature a creature is, such as Goblin, Elf, or Warrior. You find creature types in the middle of the card after “Creature —.” If a creature has more than one word after the dash, the creature has all of those creature types.

Some spells and abilities affect multiple creatures with a certain type. For example, Goblin Chieftain reads, “Other Goblin creatures you control get +1/+1 and have haste.” All other creatures you control with the Goblin creature type get the bonus.

Damage
This is what knocks down a player’s life total, lowers a planeswalker’s loyalty, and destroys creatures. Attacking and blocking creatures deal damage equal to their power. Some spells and abilities can also deal damage. Damage can be dealt only to creatures, planeswalkers, or players. If a creature is dealt damage equal to or greater than its toughness in one turn, it’s destroyed. If a planeswalker is dealt damage, that many loyalty counters are removed from it. If a player is dealt damage, it’s subtracted from the player’s life total.

Damage is different from losing life. For example, Acolyte of Xathrid’s ability reads, “Target player loses 1 life.” That loss of life isn’t damage, so it can’t be prevented.

Deathtouch
A keyword ability seen on creatures. Deathtouch is an ability that causes a creature to deal an exceptionally lethal form of damage to other creatures. A creature dealt any amount of damage by a creature with deathtouch is destroyed. If your creature with deathtouch is blocked by multiple creatures, you can assign as little as 1 damage to each of the blocking creatures!

Defender
A keyword ability seen on creatures. Creatures with defender can’t attack.

Defending player
The player who is being attacked (or whose planeswalker is being attacked) during a combat phase.

Destroy
To move a permanent from the battlefield to its owner’s graveyard. Creatures are destroyed when they’ve taken damage equal to or greater than their toughness. Also, lots of spells and abilities can destroy permanents (without dealing damage to them).

Sometimes permanents are put into the graveyard without being destroyed. If a permanent is sacrificed, it isn’t “destroyed,” but it’s still put into its owner’s graveyard. The same is true if a creature’s toughness is reduced to 0 or less, two legendary permanents with the same name are on the battlefield, two planeswalkers with the same subtype are on the battlefield, or an Aura is on the battlefield but isn’t enchanting what’s described in its “enchant” ability.

Discard
To take a card from your hand and put it into your graveyard. If a spell or ability makes you discard cards, you get to choose which cards to discard—unless the spell or ability says another player chooses the cards or you have to discard “at random.”

If you have more than seven cards in your hand during your own cleanup step, you have to discard until you have seven.

Double strike
A keyword ability seen on creatures. Creatures with double strike deal their combat damage twice. When you reach the combat damage step, check to see if any attacking or blocking creatures have first strike or double strike. If so, an extra combat damage step is created just for them. Only creatures with first strike and double strike get to deal combat damage in this step. After that, the normal combat damage step happens. All remaining attacking and blocking creatures, as well as the ones with double strike, deal combat damage during this second step.
Draw a card
To take the top card of your library (deck) and put it into your hand. You draw one card during each of your turns, at the start of your draw step. You also draw if a spell or ability lets you; this doesn’t affect your normal draw for the turn. If a spell or ability lets you put a card into your hand from your library but doesn’t use the word “draw,” it doesn’t count as drawing a card.

Draw step
See “Parts of the Turn” on page 16.

Draw the game
The other Magic meaning of “draw” is a game that ends with no winner. For example, if a spell like Earthquake deals enough damage so that both players drop to 0 or less life, the game is a draw.

Effect
What a spell or ability does when it resolves. There are several types of effects: one-shot effects, continuous effects, prevention effects, and replacement effects. You can look up each one in this glossary.

Emperor
See “Multiplayer Variants” on page 19.

Enchant
A keyword ability seen on all Auras. It’s followed by a description of a permanent (for example, “enchant creature” or “enchant land”), which tells you what kind of permanent the Aura can be attached to. When you cast the Aura, you must target that kind of permanent. If the Aura is ever attached to something that isn’t the right kind of permanent, it’s put into its owner’s graveyard.

Enchanted
When an ability of an Aura says “enchanted creature” (or “enchanted artifact,” “enchanted land,” and so on), it means “the creature the Aura is attached to.” For example, Firebreathing reads, “: Enchanted creature gets +1/+0 until end of turn.” You can give the bonus only to the creature that the Firebreathing is attached to.

Enchantment
A card type. See “Enchantment” on page 5.

End of combat step
See “Parts of the Turn” on page 16.

End step
See “Parts of the Turn” on page 16.

Ending phase
See “Parts of the Turn” on page 16.

Enters the battlefield
When artifact, creature, enchantment, and planeswalker spells resolve, they enter the battlefield as permanents. Lands also enter the battlefield as permanents.

Some triggered abilities start with “When [this permanent] enters the battlefield, . . .” When a permanent with an ability like this is put onto the battlefield, this ability triggers right away. Some abilities also trigger when certain other permanents enter the battlefield.

Some cards say they enter the battlefield tapped. These cards don’t enter the battlefield and become tapped—they’re already tapped by the time they’re put onto the battlefield. Similarly, creatures that “enter the battlefield with [some number of] +1/+1 counters,” or whose power or toughness will be modified by a continuous effect, don’t enter the battlefield and then change size.

Equip
A keyword ability seen on all Equipment. It tells you how much it costs to attach the Equipment to one of your creatures. It doesn’t matter whether the Equipment is unattached or is attached to a different creature. You can activate this ability only during your main phase, when no spells or abilities are on the stack. The equip ability targets the creature you’re moving the Equipment onto.
Equipment
A type of artifact that represents a weapon, armor, or other item that your creatures can use. When you cast an Equipment spell, it enters the battlefield like any other artifact. Once it’s on the battlefield, you can pay its equip cost any time you could cast a sorcery to attach it to a creature you control. You can do this even if the Equipment is attached to another creature. Once it’s attached to a creature, the Equipment then has some effect on it. If the equipped creature leaves the battlefield, the Equipment “drops to the ground” and stays on the battlefield, waiting for you to attach it to another creature.

Evasion ability
A nickname for any ability that makes a creature harder to block. Flying is the most common evasion ability.

Exile
A game zone. See “Exile” on page 7.

Expansion symbol
See “Parts of a Card” on page 4.

Extended
See “Constructed Formats” on page 19.

Fear
A keyword ability seen on creatures. A creature with fear can’t be blocked except by artifact creatures and/or black creatures. Fear only matters when the creature with the ability is attacking.

First strike
A keyword ability seen on creatures. Creatures with first strike deal their combat damage before creatures without first strike. When you reach the combat damage step, check to see if any attacking or blocking creatures have first strike or double strike. If so, an extra combat damage step is created just for them. Only creatures with first strike and double strike get to deal combat damage in this step. After that, the normal combat damage step happens. All remaining attacking and blocking creatures, as well as the ones with double strike, deal combat damage during this second step.

Flash
A keyword ability seen on creatures, artifacts, and enchantments. A spell with flash can be cast any time you could cast an instant.

Flavor text
Italic text (italic text looks like this) in a card’s text box that’s just for fun. Flavor text sets a tone or describes part of the magical world of the card. If the text is in parentheses, it’s there to remind you about a rule—it’s not flavor text. Flavor text has no effect on how the card is cast.

Flying
A keyword ability seen on creatures. A creature with flying can’t be blocked except by creatures with flying or reach.

Forestwalk
A kind of landwalk. See the glossary entry for “Landwalk.”

Free-for-All
See “Multiplayer Variants” on page 19.

Golden Rule
How to handle a conflict between a card and the rulebook. See “Golden Rule” on page 14.

Graveyard
A game zone. See “Graveyard” on page 7.

Hand
A game zone. See “Hand” on page 7.

Haste
A keyword ability seen on creatures. A creature with haste can attack as soon as it comes under your control. You can also activate its activated abilities with ◆ in the cost.

Indestructible
An indestructible permanent can’t be destroyed by damage or by effects that say “destroy.” They can still be put into the graveyard for other reasons. See the glossary entry for “Destroy.”

Instant
A card type. See “Instant” on page 5.
Instead
When you see this word, you know a spell or ability creates a replacement effect. See the glossary entry for “Replacement effect.”

Intimidate
A keyword ability seen on creatures. A creature with intimidate can’t be blocked except by creatures that share a color with it and/or artifact creatures. For example, a red creature with intimidate could be blocked by a red creature, a red-and-green creature, or any artifact creature. Intimidate only matters when the creature with the ability is attacking.

Intro pack
A pack that includes a ready-to-play deck featuring cards from a particular set, as well as a bonus 15-card booster pack. You can play decks from intro packs against each other right out of the box. The Magic 2010 core set has five intro packs. Each expansion has intro packs, too. When you’re just starting to play, modifying the decks from a Magic intro pack is a good way to start designing your own decks. Find stores where Magic cards are sold at http://locator.wizards.com.

Islandwalk
A kind of landwalk. See the glossary entry for “Landwalk.”

Land
A card type. See “Land” on page 6.

Land type
A subtype of a land. See the glossary entry for “Basic land type.”

Landwalk
Landwalk is the name for a group of keyword abilities that includes plainswalk, islandwalk, swampwalk, mountainwalk, and forestwalk. A creature with landwalk is unblockable if the defending player controls at least one land of the specified type.

Landwalk abilities don’t cancel each other out. For example, let’s say your creature with forestwalk attacks a player who controls a Forest. That player can’t block your forestwalker at all—not even with another forestwalker.

Leaves the battlefield
A permanent leaves the battlefield when it moves from the battlefield zone to any other zone. It might return to a player’s hand from the battlefield, go to a graveyard from the battlefield, or go to some other zone. If a card leaves the battlefield and later returns to the battlefield, it’s like a brand-new card. It doesn’t “remember” anything from the last time it was on the battlefield.

Legacy
See “Constructed Formats” on page 19.

Legendary
Legendary is a supertype, so you’ll find it written on the type line before the card type. There can be only one of a particular legendary permanent on the battlefield at a time. If two or more legendary permanents with the same name are ever on the battlefield at the same time, they’re all put into their owner’s graveyard. This is known as the “legend rule.”

Library
A game zone. See “Library” on page 7.

Life, life total
Each player begins the game with 20 life. When you’re dealt damage by spells, abilities, or unblocked creatures, you subtract the damage from your life total. If your life total drops to 0 or less, you lose the game. If something causes both players’ life totals to drop to 0 or less at the same time, the game is a draw.

Lifelink
A keyword ability seen on permanents. Damage dealt by a permanent with lifelink causes that permanent’s controller to gain that much life, in addition to behaving like normal damage.

Limited
A group of play formats using cards from booster packs you open just before you play. See “Limited Formats” on page 18.
Losing life
All damage dealt to you causes you to lose life, which is why it’s subtracted from your life total. In addition, some spells and abilities say that they cause you to lose life. This isn’t the same as damage, so it can’t be prevented.

Loyalty
Loyalty is a characteristic that only planeswalkers have. Each planeswalker card has a loyalty number printed in its lower right corner: that’s how many loyalty counters it gets as it enters the battlefield. The cost to activate one of a planeswalker’s activated abilities is to put loyalty counters on it or remove loyalty counters from it. Each 1 damage dealt to a planeswalker causes a loyalty counter to be removed from it. If a planeswalker has no loyalty counters on it, it’s put into its owner’s graveyard. See also “Planeswalker” on page 6.

Main phase
See “Parts of the Turn” on page 16.

Mana
The magical energy you use to pay for spells and some abilities. Most mana comes from tapping lands. There are five colors of mana: 🌈 (white), 🌊 (blue), 🌋 (black), 🌟 (red), and ♠️ (green). There’s also colorless mana.

Mana ability
An ability that adds mana to your mana pool. Mana abilities can be activated abilities or triggered abilities. A mana ability doesn’t go on the stack when you activate it or it triggers—you simply get the mana immediately.

Mana cost
See “Parts of a Card” on page 4. Also see the glossary entry for “Converted mana cost.”

Mana pool
The place where your mana is stored until you spend it. When mana gets added to your mana pool, it stays there until you spend it or until the current step or phase ends.

Match
A series of games against the same opponent. Most matches are best two out of three, so the first player to win two games wins the match. The loser of the first game decides who goes first in the second game, and so on.

Mountainwalk
A kind of landwalk. See the glossary entry for “Landwalk.”

Mulligan
At the beginning of a Magic game, you draw the top seven cards of your library. That’s your starting hand. If you don’t like your starting hand of cards for any reason, you can mulligan.

When you mulligan, your hand is shuffled into your library and you draw a new hand of one fewer cards. You can mulligan as many times as you want, but you draw one fewer card each time. When both players like their opening hands, you start playing.

Multicolored card
A card with more than one color of mana in its mana cost. For example, a card with the mana cost 🌈🌈 is both black and red. Most multicolored cards have a gold background.

Multiplayer game
A Magic game that starts with more than two players in it. See “Multiplayer Variants” on page 19.

Name
See “Parts of a Card” on page 4.

When a card’s name appears in its text box, the card is referring to itself, not to any other cards with the same name.

Non-
When a spell or ability’s text refers to a “nonland card” or a “nonblack creature,” and so on, it means “a card that’s not a land,” “a creature that’s not black,” and so on.
Glacial Fortress enters the battlefield tapped unless you control a Plains or an Island.

\[\text{oT} \rightarrow \text{Add } \text{oW} \text{ or } \text{oU} \text{ to your mana pool.}\]

**Nonbasic land**

Any land that doesn't have the supertype “basic” on its type line—in other words, any land not named Plains, Island, Swamp, Mountain, or Forest. You can't put more than four copies of any one nonbasic land card into a deck.

**One-shot effect**

An effect that applies to the game once, and then it's done. For example, Divination reads, “Draw two cards.” When it resolves, its effect is done. One-shot effects differ from continuous effects, which last for some amount of time.

**Opponent**

A person you're playing against. If a card says “an opponent,” it means one of its controller's opponents.

**Owner**

The person who started the game with the card in his or her deck. Even if your opponent has control of one of your permanents, you're still its owner. (If you loaned your friend a deck, he or she will be the “owner” of all the cards in it during the game.) The owner of a token is the player who controlled it when it came into play.

**Paying life**

Sometimes a spell or ability will ask you to pay life as part of its cost. To pay life, subtract that amount of life from your life total. You can't pay more life than you have. Paying life isn't damage, so it can't be prevented.

**Permanent**

A card or creature token on the battlefield. Permanents can be artifacts, creatures, enchantments, lands, or planeswalkers. Once a permanent is on the battlefield, it stays there until it's destroyed, sacrificed, or removed somehow. You can't remove a permanent from the battlefield just because you want to, even if you control it. If a permanent leaves the battlefield and then re-enters the battlefield, it's treated like a brand-new card. It doesn't “remember” anything about the last time it was on the battlefield.

Unless they say otherwise, spells and abilities affect only permanents. For example, Unsummon reads, “Return target creature to its owner's hand.” You must target a creature on the battlefield, not a creature card in a graveyard or anywhere else.

**Permanent type**

The permanent types are artifact, creature, enchantment, land, and planeswalker. Permanents can have more than one type.

**Phase**

One of the main sections of a turn. There are five: beginning phase, first main phase, combat phase, second main phase, and ending phase. Some phases are divided into steps. See “Parts of the Turn” on page 16.

If a player has mana left over as a step or phase ends, that mana is lost.

**Planeswalker**

A card type. See “Planeswalker” on page 6.

**Planeswalker type**

A subtype of a planeswalker. There can be only one version of a planeswalker on the battlefield at a time. If two or more planeswalkers with the same planeswalker type are ever on the battlefield at the same time, they're all put into their owner's graveyard.

**Play**

You play a land by putting it onto the battlefield from your hand. You can play a land only once each turn during one of your main phases when nothing's on the stack. Lands don't go on the stack when you play them.

Some effects tell you to play a card. That means to play a land or cast a spell, depending on the card's type.

**Player**

Either you or your opponent. If a spell or ability lets you choose a player, you can choose yourself. You can't choose yourself if it says “opponent.” If you're playing a multiplayer game (a game with more than two players), everyone in the game is a player, including your teammates.
Power
The number to the left of the slash in the box in the lower right corner of a creature card. A creature deals combat damage equal to its power. A creature with 0 power or less deals no damage in combat.

Prevent
When you see this word in the text of a spell or ability, you know it’s a prevention effect.

Prevention effect
An effect that stops damage from being dealt. A prevention effect works like a shield. If damage would be dealt but a prevention shield is in place, some or all of that damage isn’t dealt. A prevention effect can prevent all damage a source would deal, or it can prevent just a specific amount of damage.

For example, Fog reads, “Prevent all combat damage that would be dealt this turn.” You can cast Fog long before combat, and its effect will hang around for the whole turn. Then, if creatures try to deal combat damage during that turn, Fog prevents it.

Prevention effects can prevent damage from being dealt to creatures, to players, or both. If a prevention effect could prevent damage from being dealt by multiple sources at the same time, the player who would be dealt that damage, or who controls the creature that would be dealt that damage, chooses which source to prevent the damage from.

Priority
Since players can cast instants and activate abilities during each other’s turns, the game needs a system that makes sure only one player can do something at a time. Priority determines, at any given time, which player can cast a spell or activate an activated ability.

The active player (the player whose turn it is) gets priority at the beginning of each step and each main phase—except for the untap step and the cleanup step. When you get priority, you can cast a spell, activate an activated ability, or pass (choose to do nothing). If you do something, you keep priority, so you make the same choice again. If you pass, your opponent gets priority, so now he or she gets that choice. This goes back and forth until both players pass in a row.

When both players pass in a row, if there’s a spell or ability waiting on the stack, it resolves. Then the active player gets priority again, and the system repeats. When both players pass in a row, if there’s no spell or ability waiting on the stack, that part of the turn ends and the next one begins.

Protection
A keyword ability seen on creatures. A creature with protection will always have “protection from ________.” That something is what the creature is protected from. It might be protection from red, for example, or protection from Goblins. Protection does several specific things for the creature:
• All damage those kinds of sources would deal to the creature is prevented.
• The creature can’t be enchanted by those kinds of Auras or equipped by those kinds of Equipment.
• The creature can’t be blocked by those kinds of creatures.
• The creature can’t be targeted by those kinds of spells or by abilities from those kinds of cards.

Put onto the battlefield
To move a card or token into the battlefield zone. When a spell or ability tells you to put something onto the battlefield, that’s not the same as casting it. You just put it onto the battlefield without paying its costs.

Rarity
How likely it is you’ll get a particular card. There are four levels of rarity for Magic cards: common, uncommon, rare, and mythic rare. Each 15-card booster pack typically has eleven common cards including one basic land card, three uncommon cards and one rare card. Some boosters have a mythic rare card instead of a rare card.

Reach
A keyword ability seen on creatures. A creature with reach can block a creature with flying. Note that a creature with reach can be blocked by any kind of creature.
Regenerate

To prevent a permanent from being destroyed later in the turn. A regeneration effect works like a shield. A spell or ability that says “Regenerate [a permanent]” puts a regeneration shield on that permanent that can be used up at any time during the turn. If a permanent would be destroyed and it has a regeneration shield, it’s not destroyed. Instead, it becomes tapped, it’s removed from combat (if it’s an attacking or blocking creature), and all damage is removed from it. That regeneration shield is then used up. The permanent never leaves the battlefield, so any Auras, Equipment, or counters that were on it remain there. Any unused regeneration shields go away during the cleanup step.

Although a permanent with a regeneration shield can’t be destroyed, it can still be put into the graveyard for other reasons. See the glossary entry for “Destroy.”

Reminder text
Text in italics (italic text looks like this) in the text box that reminds you of a rule or keyword ability. Reminder text isn’t meant to tell you all the rules for an ability. It just reminds you of how the card works.

Remove from combat
If an effect removes a creature from combat, it’s not attacking or blocking anymore. If it blocked a creature before it was removed, the attacking creature stays blocked, so no damage would get through to the player or planeswalker that’s being attacked. A creature that’s removed from combat neither deals nor is dealt combat damage.

Replacement effect
A kind of effect that waits for a particular event and then replaces that event with a different one. Replacement effects have the word “instead” in them. For example, Darksteel Colossus reads, in part, “If Darksteel Colossus would be put into a graveyard from anywhere, reveal Darksteel Colossus and shuffle it into its owner’s library instead.” The effect replaces the action of putting Darksteel Colossus into the graveyard with the action of shuffling it into its owner’s library. Darksteel Colossus never hits the graveyard at all.

Resolve
When you cast a spell or activate an activated ability, or when a triggered ability triggers, nothing happens right away. It just goes on the stack. After each player gets a chance to respond to it, it will resolve and its effect will happen. If another spell or ability counters it, or if none of its targets are legal when it tries to resolve, it won’t resolve at all (and if it’s a spell, it’s put into its owner’s graveyard).

Respond, in response
To cast an instant or activate an activated ability right after another spell or ability has been put on the stack. See “Responding to a Spell” on page 9.

Reveal
When you reveal a card, it’s shown to all the players in the game.

Sacrifice
To choose one of your permanents on the battlefield and put it into its owner’s graveyard. You can sacrifice only permanents you control. Sacrificing a permanent is different from destroying it, so the permanent can’t be regenerated. You can sacrifice a permanent only if a spell or ability tells you to, or if it’s part of a cost.

Sealed Deck
See “Limited Formats” on page 18.

Shroud
A keyword ability seen on permanents. A permanent with shroud can’t be the target of spells or abilities—not even your own.

Shuffle
To randomize the order of the cards in your deck. At the beginning of every Magic game, your deck is shuffled. Some cards will tell you to shuffle your library as part of their effect (usually because the effect lets you look through your library).

Sideboard
A group of extra cards you can use to modify your deck in between games with the same opponent. See the explanation of “Sideboards” on page 18.
Sorcery
A card type. See “Sorcery” on page 4.

Source
Where damage or an ability came from. Once an ability has gone on the stack, removing its source doesn't stop the ability from resolving.

Spell
All types of cards except lands are spells while you're casting them. For example, Shivan Dragon is a creature card. While you're casting it, it's a creature spell. When it resolves, it becomes a creature.

Stack
A game zone. See “The Stack” on page 7.

Standard
See “Constructed Formats” on page 19.

Static ability
One of the three types of abilities a permanent can have. See “Static Abilities” on page 11.

Step
Every phase except the main phase is divided into steps. Specific things happen during some steps. For example, you untap your permanents during your untap step. See “Parts of the Turn” on page 16.

If a player has mana left over as a step or phase ends, that mana is lost.

Subtype
All types of cards can have subtypes. Subtypes come after the long dash on the type line. Subtypes of creatures are also called creature types, subtypes of lands are called land types, and so on. A card can have multiple subtypes or none at all. For example, a “Creature — Elf Warrior” has the subtypes Elf and Warrior, but a card with just “Land” on its type line doesn't have a subtype.

A few subtypes have special rules. See the glossary entries for “Aura,” “Equipment,” “Basic land types,” and “Planeswalker types.” Creature subtypes don't have any special rules associated with them.

Some effects can change a permanent's subtype. For example, “Target creature becomes an Elf until end of turn.” The new subtype replaces the previous subtypes of the appropriate kind, unless the ability says otherwise.

Supertype
All types of cards can have supertypes. Supertypes come before the card type on the type line. For example, a “Basic Land — Forest” has the supertype “basic,” and a “Legendary Creature — Human Barbarian” has the supertype “legendary.” Supertypes have no specific correlation to card types. Some supertypes have specific rules associated with them.

Swampwalk
A kind of landwalk. See the glossary entry for “Landwalk.”

Tap
To turn a card sideways. See the explanation of “Tapping” on page 8.

Target
A word used in spells and abilities. See the explanation of “Target” on page 9.

Text box
See “Parts of a Card” on page 4.

Token
Some instants, sorceries, and abilities can create creatures. These creatures are represented by tokens. You can use anything you want as a token, but you should use something that can be tapped.

Tokens are considered creatures in every way, and they’re affected by all the rules, spells, and abilities that affect creatures. If one of your token creatures leaves the battlefield, however, it moves to the new zone (such as your graveyard) and then immediately vanishes from the game.

Toughness
The number to the right of the slash in the box in the lower right corner of creature cards. If a creature is dealt damage equal to or greater than its toughness in a single turn, it’s destroyed. If a creature’s toughness is reduced to 0 or less, it’s put into its owner's graveyard.

Trample
A keyword ability seen on creatures. Trample is an ability that lets a creature deal excess damage to the player or planeswalker it’s attacking even if it’s blocked. When a creature with trample is blocked, you have to deal at least enough of its combat damage to the creatures blocking it to destroy all those creatures. But if each creature is assigned damage at least equal to its toughness, then you can assign any of its damage that’s left over to the player or planeswalker it’s attacking.
Trig**gled ability**
One of the three types of abilities a permanent can have. See “Triggered Abilities” on page 11.

T**urn**
Each turn is divided into phases, and most phases have steps. See “Parts of the Turn” on page 16.

</tbody>
</table>

**Two-Headed Giant**
See “Multiplayer Variants” on page 19.

**Type line**
See “Parts of a Card” on page 4.

**Unblockable**
If an attacking creature is unblockable, it’s impossible for the defending player to block it with a creature.

**Unblocked**
A creature is unblocked only if it’s attacking and the defending player has decided not to block it.

**Untap**
To turn a tapped card upright so it’s ready to be used again. See the explanation of “Tapping” on page 8.

**Untap step**
See “Parts of the Turn” on page 16.

**Upkeep step**
See “Parts of the Turn” on page 16.

**Vigilance**
A keyword ability seen on creatures. When a creature with vigilance attacks, it doesn’t become tapped.

**Vintage**
See “Constructed Formats” on page 19.

**Winning the game**
You win the game when any of the following things happen:

- Your opponent’s life total is reduced to 0 or less.
- Your opponent has to draw a card from an empty library.
- Your opponent has 10 or more poison counters. (No cards in the Magic 2010 core set can give players poison counters.)
- A spell or ability says that you win the game or your opponent loses the game.
- Your opponent concedes.

If both players would lose the game at the same time, the game is a draw—nobody wins.

**X**
When you see X in a mana cost or an activation cost, you get to choose the number that X stands for. For example, Earthquake is a sorcery that costs \(XR\). Its text reads, “Earthquake deals X damage to each creature without flying and each player.” When you cast Earthquake, you choose what number \(X\) is. If you pick four, for example, Earthquake costs \(4R\) and deals 4 damage. If you pick one, Earthquake costs \(1R\) and deals 1 damage.

**You**
The word “you” on a spell or ability refers to the current controller of that spell or ability.

**Zone**
An area of play in a Magic game. See “Game Zones” on page 7.
It’s easier than ever to find a place to play the world’s premier trading card game.
